

# Integrating AI into Assessment

Partnering with AI to Support Learning

## Structure

Transparent, equitable guidelines support

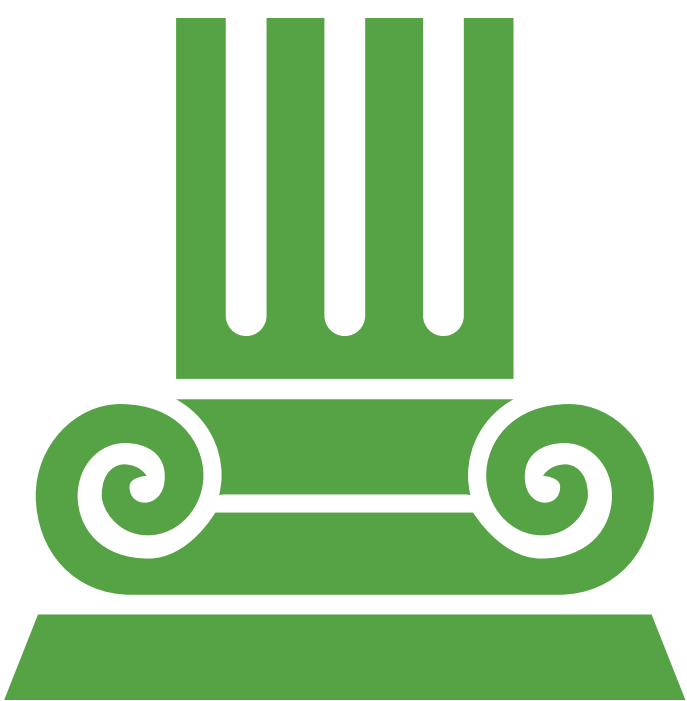

- responsible AI use
- acknowledge detection limits
- account for student diversity, access, and context

## Support

When introduced with intentionality rather than encouraging cognitive offloading, AI enhances learning by

- helping students take intellectual risks
- explore ideas
- deepen understanding

## Integrity

Clear expectations help students use AI to develop

- critical thinking skills
- processes and problem-solving skills
- their authentic voice
